

Product Name: Fuel Injector Cleaner

Product Type: Gasoline Fuel System Cleaner

Application: For use in all gasoline engines: cars, SUVs, light trucks, motorcycles, and small marine engines

Formulation Base: Synthetic Solvent Blend with Detergents

Product Overview

Fuel Injector Cleaner is designed to restore engine efficiency by removing carbon, gum, and varnish deposits from injectors and intake valves. Regular use ensures better combustion, improved throttle response, and fuel economy.

Application

Add entire bottle (typically 300ml) to a full tank of gasoline (40–60 liters). For best results, use every 5,000–7,000 km or as recommended.

Performance Benefits

- Powerful cleaning action on fuel injectors
- Reduces knocking, pinging, and hesitation
- Improves fuel atomization and combustion
- Compatible with catalytic converters and oxygen sensors.

Direction for Use:

our entire contents into a nearly empty fuel tank, then fill with up to 60 liters of gasoline. One bottle treats up to 60L. Use regularly for best results.

Typical Properties

Property	Typical Value
Appearance	Clear, light amber liquid
Odor	Solvent-like
Density @ 15°C	0.820 – 0.840 g/cm ³
Flash Point (Closed Cup)	> 62°C
Boiling Point	> 160°C
Viscosity @ 40°C	1.2 – 2.5 mm ² /s
Solubility in Gasoline	Fully miscible
Detergency	Strong, polyetheramine-based
Ash Content	< 0.01%
Treat Rate	250 ml per 50–60 liters fuel

Performance Features:

- Effective in all types of fuel injection systems
- Removes carbon and varnish from injectors and combustion chamber
- Prevents corrosion and fuel degradation
- Ensures complete combustion and smoother idling
